SUMMARY

Senior Software Engineer (Backend) with 5+ years building scalable, production-grade APIs, AI/LLM-powered products, and event-driven systems on AWS and GCP. Specialising in Python, Node.js, GraphQL, and multi-model LLM orchestration across OpenAI, Google Gemini, and Anthropic Claude.

EXPERIENCE

Senior Software Engineer (Backend), LiftOff LLC

Bengaluru, India · 2021 — Present

- Engineered scalable backend APIs handling thousands of daily requests on QuiltAI's social intelligence platform.
- Led multi-model LLM orchestration across OpenAI, Google Gemini, and Anthropic Claude — covering prompt engineering, response optimisation, and cost-aware model routing for production workloads.
- Built data ingestion pipelines for Instagram, TikTok, and YouTube — processing high-volume social signal into structured, analytics-ready datasets.
- Architected microservices on AWS and GCP with Docker and GitHub Actions for zero-downtime deployments.
- Delivered backend services across client web platforms — Bowie Barker, Squeeze, and Okay Humans — covering booking flows, memberships, Stripe payments and subscriptions, and integrations with Zenoti, MyTime, Klaviyo, and Brevo.
- Designed real-time and event-driven systems — SSE streams in FastAPI for LLM responses, Redis-backed GraphQL subscriptions, and async pipelines in Python; orchestrated workflows with Prefect and Cloud Tasks; deployed edge compute on Cloudflare Workers.

PROJECTS

Nuo — Notes & Tasks App (Personal)

Notes and task manager combining a block-based editor with daily planning — My Day, due dates, calendar sync, and end-to-end encrypted groups; mobile-first PWA with an Android (TWA) release and unit + E2E test suites.

Tech: Next.js, TypeScript, Prisma, PostgreSQL, PWA, Vitest, Playwright. URL: nuo-app.vercel.app

Sitecraft (Open Source)

Free, open-source AI website builder that turns plain-language descriptions into single-page websites — multi-model orchestration across four free 70B-class endpoints with mid-conversation model switching and HTML export.

Tech: Next.js 16, React 19, Auth.js v5, Vercel Postgres, Multi-LLM. URL: wiz-craft.vercel.app

App Architect (Open Source)

AI-powered design workflow that turns raw app ideas into production-ready specs through five structured phases, ending in a developer-ready TDD brief with tests and CI config.

Tech: Claude Artifacts, JavaScript, Vercel. URL: promptcraft-io.vercel.app

SKILLS

AI and LLMs: Anthropic Claude, OpenAI API, Google Gemini, Groq, Prompt Engineering, LLM Orchestration, RAG

Backend: Python, Node.js, TypeScript, FastAPI, Express, GraphQL, REST APIs, BullMQ

Databases: PostgreSQL, MongoDB, Redis, Prisma, Pinecone

Cloud and DevOps: AWS, GCP, Vercel, Cloudflare Workers, Docker, GitHub Actions

Streaming and Workflows: SSE, GraphQL Subscriptions, Webhooks, Prefect, Google Workflows, Cloud Tasks

Integrations: Stripe, Zenoti, MyTime, Klaviyo, Brevo

EDUCATION

Full Stack Development — Zen Class — GUVI (IITM Pravartak Certified) · 2020 — 2021

Bachelor of Engineering, Civil Engineering — Dayananda Sagar College of Engineering, Bangalore · 2014 — 2018
